Debt and Deficit (Lack of) Progress Report: June 2026

JORDAN HARING | JULY 14, 2026

Executive Summary

- The U.S. Department of the Treasury's June 2026 Monthly Treasury Statement shows the federal budget deficit totaled \$1.4 trillion during the first nine months of fiscal year (FY) 2026 - \$29 billion higher than in FY 2025; the FY 2026 cumulative deficit was the net effect of \$4.2 trillion of revenue collections and \$5.5 trillion of spending.
- On a monthly basis, the budget deficit totaled \$120 billion in June 2026 - \$147 billion higher than in June 2025; the June 2026 deficit was the net effect of \$496 billion of revenue collections and \$616 billion of spending.
- Revenue is up by \$143 billion in FY 2026, driven largely by higher individual income and payroll tax collections and larger customs duties.
- Spending is up by \$172 billion in FY 2026, driven largely by higher entitlement spending and larger interest payments on the national debt.
- The national debt totaled \$31.7 trillion at the end of June 2026 - \$2.7 trillion higher than the debt at the end of June 2025.

Introduction

The U.S. Department of the Treasury's [June 2026 Monthly Treasury Statement](#) shows the federal budget deficit totaled \$1.4 trillion during the first nine months (October-June) of fiscal year (FY) 2026. The \$1.4 trillion deficit was the net effect of \$4.2 trillion of revenue collections and \$5.5 trillion of spending. The cumulative FY 2026 deficit was \$29 billion (2 percent) higher than the cumulative FY 2025 deficit of \$1.3 trillion. The change was the net effect of \$143 billion of higher revenue collections and a \$172 billion increase in spending.

On a monthly basis, the budget deficit totaled \$120 billion in June, which was the net effect of \$496 billion of revenue collections and \$616 billion of spending. The June 2026 deficit was \$147 billion higher than the \$27 billion budget surplus recorded in June 2025. This was the net effect of \$31 billion of lower monthly revenue collections and a \$117 billion increase in spending.

Revenue Is Up in FY 2026

Federal revenue collections rose by \$143 billion (4 percent) during the first nine months of FY 2026 compared to last year. Individual income tax receipts increased by \$136 billion (7 percent) and payroll tax collections rose by \$34 billion (3 percent) due to rising wages and salaries. Corporate income tax receipts declined by \$87 billion (24 percent) due to the One Big Beautiful Bill's business tax changes, including larger tax deductions for certain business investments. Customs duties rose by \$55 billion (51 percent) due to tariff changes made through executive action. Notably, customs duties declined drastically in May and June as the federal government issued about \$70 billion of the \$166 billion total eligible tariff refunds to businesses that paid tariffs imposed under the International Emergency Economic Powers Act, which the Supreme Court ruled was illegal. Estate and gift taxes increased by \$8 billion (35 percent), excise tax collections remained flat at \$75 billion, and other sources of revenue declined by \$3 billion (11 percent).

Spending Is Up in FY 2026

Federal spending rose by \$172 billion (3 percent) during the first nine months of FY 2026 compared to the corresponding period last year. Social Security spending increased by \$63 billion (5 percent) due to increases in average monthly benefits and the number of beneficiaries enrolled in the program. Medicare spending rose by \$57 billion (8 percent) due to higher enrollment and payment rates for services, and Medicaid spending increased by \$49 billion (10 percent) because of higher per-enrollee costs. Other health spending, including on the Children's Health Insurance Program and Affordable Care Act premium tax credits, declined by \$2 billion (1 percent).

National defense spending increased by \$31 billion (4 percent) due to higher spending on military personnel and research and development. Spending on veterans benefits and services rose by \$27 billion (10 percent) because more people received benefits and spending per beneficiary rose. Spending on income security programs, including the Supplemental Nutrition Assistance Program, Supplemental Security Income, and Temporary Assistance for Needy Families, fell by \$11 billion (2 percent) in part because of the One Big Beautiful Bill's reforms to certain income security programs.

Interest payments on the national debt increased by \$78 billion (10 percent) because the debt was larger and long-term interest rates were higher. Net interest remains the second-

largest government expenditure behind Social Security.\

The National Debt Is Unsustainable

At the end of June 2026, federal debt held by the public totaled \$31.7 trillion. This was \$2.7 trillion higher than the \$29.0 trillion debt at the end of June 2025.

Since May of 2019 – before the fiscal impact of the COVID-19 pandemic really materialized – the national debt has nearly doubled and is projected to continue to rise over both the short- and long-term.
