Press Release

ICYMI: Deregulation Under Trump, An Update

PATRICK HEFFLINGER | JANUARY 23, 2018

The American Action Forum released an updated analysis of deregulatory moves taken by the Trump Administration.

See excerpt below:

“Overall, the Trump Administration published 23 final actions under its one-in, two-out executive order with estimated annualized cost savings. These actions totaled $893 million in annualized savings.

Our analysis shows that while the bulk of regulatory savings continue to be achieved through delays and paperwork changes, savings derived from substantive regulatory changes increased remarkably over the last two months of the administration’s first year.”
