The Benefits of NAFTA

JULY 18, 2016

The North American Free Trade Agreement (NAFTA) has contributed to economic growth, job growth, and investment growth. NAFTA is responsible for generating 5 million jobs in the U.S., and GDP has grown by 63% since the agreement went into effect. This is 10 percentage points higher than the average growth rate of all OECD nations during that time.

THE BENEFITS OF NAFTA

Since entering into force, NAFTA member countries have experienced higher economic growth, job growth, and investment growth.
