Press Release

Understanding the Administration's Affordable Clean Energy Rule

ALLISON EDWARDS | JULY 16, 2019

The Trump Administration recently finalized its replacement for the Clean Power Plan, which aimed to reduce carbon emissions from power plants. AAF's Director of Regulatory Policy Dan Bosch explains in a brief video the environmental and economic impact of the administration's Affordable Clean Energy (ACE) rule.

AAF's Regulatory Policy team also has an in-depth analysis of how the Environmental Protection Agency's revised calculations of the ACE rule shifted it from a net deregulatory rule into a net regulatory one.

Watch the video.
