

Week in Regulation

\$12.9 Billion in Costs

SAM BATKINS | MAY 30, 2014

After a slow week, regulators added more than \$12.9 billion in total costs (\$40 per person in the U.S.) and 355,000 paperwork burden hours. Annualized costs were \$658 million, compared to \$2 billion in benefits. A Department of Energy efficiency standard rule for electric motors led the week.

AAF has catalogued regulations according to their codification in the Code of Federal Regulations (CFR). The CFR is organized into 50 titles, with each title corresponding to an industry or part of government. This snapshot will help to determine which sectors of the economy receive the highest number of regulatory actions.

The Department of Energy standard for motors would impose \$12.5 billion present value costs, or \$517 million annually. AAF reviewed the [rule here](#) and noted the final version increased by more than \$800 million compared to the proposed rule. California, Ohio, Texas, and Wisconsin are most affected by the new standards. The payback period for consumers, that is the time it takes for the efficiency savings to exceed higher initial costs, ranges from 3 to 4.5 years.

The administration also proposed a rule for durable medical equipment. The costs of the proposal are primarily because of requirements for additional documentation. The average annual paperwork burden over ten years is 304,000 hours, with annual costs of \$14 million.
